

RULER FOOT & TEMPLATE SIZE GUIDE

To determine your shank size, all you need to do is lower your foot and then measure the height of the center of the hole for the screw from the needle plate. We offer 4 different 1/2" Foot styles and 2 different thicknesses of templates for Domestic machines based on shank height. The "1/2" refers to the diameter of the foot. This results in a stitch line that is always 1/4" from the needle. Machines not listed? Use the size test to the right, or call to confirm.

DOMESTIC MACHINE 1/2 RULER FOOT SIZES

High Shank Special Foot (HSS)

High Shank Foot (HS)
